Management and administration of an

enterprise

Support the development of a new service to provide secure, reliable storage to university researchers, including recruitment of a new support position.

Provide secure and reliable storage to university researchers to conduct and store research data.

Number and amount of research data stores moved or housed on the new storage infrastructure and the number of consulting engagements that are completed by the new support position.

Introduction of storage technology stack that will increase security and resiliency for researcher storage data leading to an improved security posture overall for the research community.
